

## **Single Feasible Source Purchase**

Title: Licenses and Support for Oracle Identity Management Products

Description: The Information Technology Services Division requires software licenses and support for Oracle Identity Management Products which have been established as a state standard. The Oracle products and support are proprietary to Oracle. It is financially feasible to purchase the Oracle Identity management products and associated support from Oracle and not through resellers since resellers are not able to provide the deep discounts available from Oracle direct. The requirement detailed above represents a proprietary requirement since the software is proprietary to Oracle and the deep discount is only available from Oracle. Furthermore, Oracle has offered an additional discount if an order is received no later than February 27, 2014. As the intended purchase meets the statutory criteria regarding proprietary requirements and limited period discounts allowing single feasible source purchases under RSMo 34.044, the State is pursuing this acquisition as a Single Feasible Source.
